THE STUDENTS OF LAURELBROOK DEDICATE...

this, our first annual, to you, Mr. Bob, a man whose name has become interchangeable with Laurelbrook's -- but more than that, a man who has been an interesting teacher, a devoted principal, and most of all, a real friend to us.

You have worked with us, played with us, disciplined us, laughed, sympathized and counseled with us.

You have dedicated your life to helping and educating young people.

"No line of manual training is of more value than agriculture. . . . In the study of agriculture, let pupils be given not only theory but practice. While they learn what science can teach in regard to the nature and preparation of the soil, the value of different crops, and the best methods of production, let them put their knowledge to use."
